INTERIJERI PO MJERI

Design and manufacture of made to measure furniture, equipping facilities and business interiors

www.manitu.hr

About us

MANITU d.o.o.

is the company for high aesthetic interior design that provides professional services of design, decoration and furnishing of private homes and business premises.

MANITU
INTERIJERI PO MJERI

The company founded in 2007 in **100% Croatian ownership** with its primary activity on the raw materials market enriched its assortment in 2010 and **launched its own production of made to measure furniture** and interior design of residential and commercial areas.

PRIMARY GOAL AND BUSINESS PHILOSOPHY

of the company is simple: understand the customers' needs, meet the demands and ultimately exceed their expectations !

MEASURING YOUR SPACE

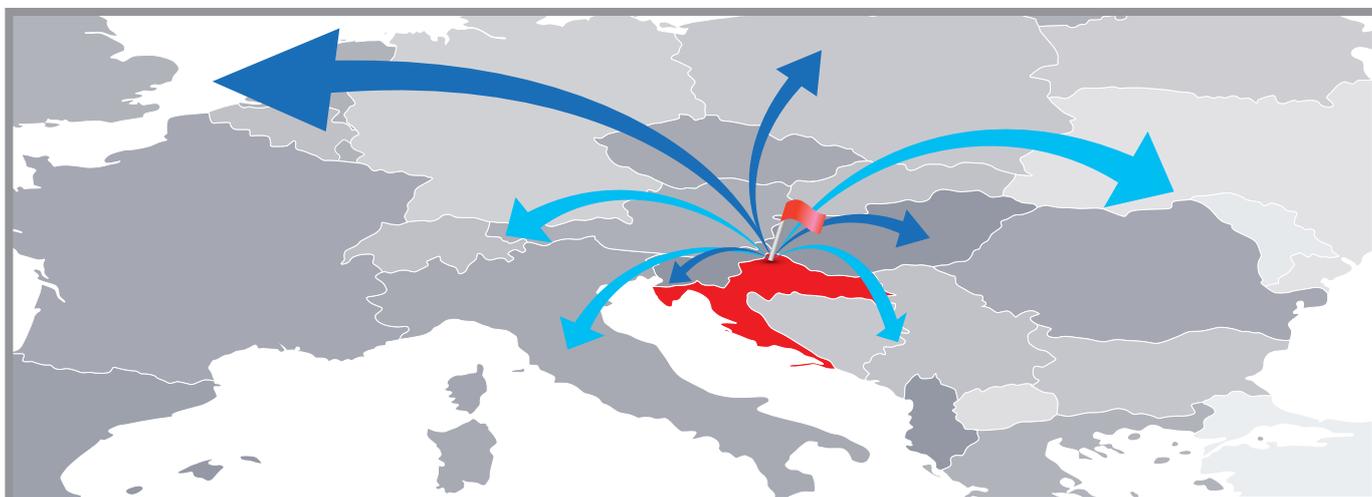

At the appointed time our professional staff will come to measure your premises, precisely define all the settings and present our production programs.

3D VIEW

The development of layouts available in order to provide you with a simple, yet more creative choice.

DELIVERY AND ASSEMBLY

Our experienced team of fitters will deliver and install your furniture with our own fleet at the appointed time. Also, our team of fitters is at your service for any additional questions.

Equip your interior, all in one place.
Contact us with confidence !

Business premises and offices

Besides the furniture for private clients the specialty of Manitu d.d. is manufacturing the furniture for offices. The basic precondition for performing work commitments in a high quality manner is functional and comfortable office space. By planning and selecting the materials your business premises will take the role of a spokesman of your company giving a message to all clients and users who daily use it. The program for furnishing office premises leads us into a completely different way of interior design, because as opposed to households, office premises require maximum precision and complete elegance. Therefore, in addition to standard materials, glass is also used, accompanied with the highest quality fittings and accessories.

The program of equipping office premises includes facilities such as office and retail space, receptions and conference rooms, equipping schools, kindergartens and pharmacies. It is tailored to meet all the requirements whether you want your business designed in combination of wooden surfaces and a wide selection of metal frames and accessories or it will be a classic office furniture completely made of wood, so in your office you could feel all the warmth that it provides. The offer includes desks and conference tables, filing cabinets, mobile cabinets with drawers, libraries, shelves and open cabinets.

Furniture and equipment for pharmacies

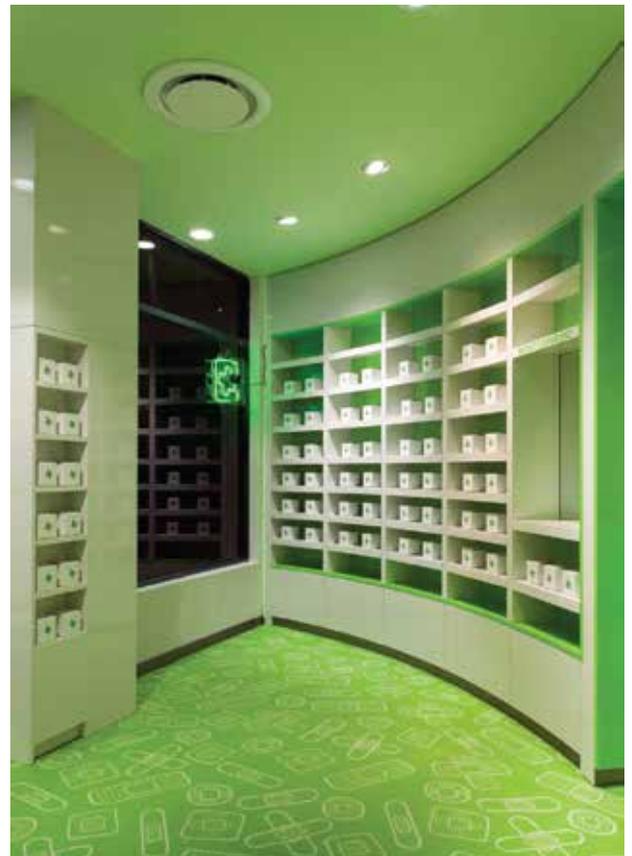

As part of the retail stores program we have specialised in equipping pharmacies. Besides the furniture we offer a range of accessories that increase the pharmacy functionality.

Based on the layout of a pharmacy in consultation with the client, our team in collaboration with designers offers a complete solution for equipping a pharmacy. Functionality, quality and durability of the pharmacy furniture is at the highest level, which provides the assurance that the funds invested in equipping the pharmacy will be returned in a short period of time.

There are recipes and retro counters fitted with drawers, professional tray systems. The serving counters are of modern design and can be tailored to the needs of every pharmacy (glass railings, glass barriers, purse holders, blood pressure device carriers, etc.).

When designing the pharmacy furnishing we use 3D software that allows visualisation of space and provides an insight into the appearance and functionality of the proposed solutions. The design of the pharmacy interior project is included in our service and is free of charge in case the project is realised.

Solid surface materials

MANITU d.o.o. is a one of the manufacturers of Kerrock[®], GetaCore[®], LG HiMacs[®], Corian[®] and related "solid surface" materials.

Folding conference tables

Conference tables of modern design for continuous or periodic use. They can be folded when not in use.

The tabletop is made of 25 mm thin material available in several decors and dimensions, with the stand in the aluminum or chrome colour.

Catering tables

Round tables Ø 160 cm for catering and banquets suitable for gardens and interiors.

Table top is made of durable material, the base of the table is made of metal and can be fixed or fully retractable under the table top.

Tables are characterised by high load capacity.

Other dimensions of round tables:

From Ø 800 - Ø 2000 mm

Round tables are 74 cm high.

Number of seats around the tables: 6-12 persons.

Reception desks and counters

The first impression you get when you first step into an office, business premises or a hotel is very important. This is where the reception desk plays an extremely important role.

Manitu company develops the reception desk systems that will certainly leave a strong impression.

Sophisticated design and modern materials such as lacquered glass, solid wood, MDF, chipboard or discreet interior lighting make this furniture system visually very attractive.

Office Equipment

When furnishing reception desks, counters, offices and other business premises, our aim is to provide you with a complete service, so we decided to include in our offer some elements of office supplies, paying special attention to their quality, as well as the aesthetic value.

Apartments and hotels

Furniture for hotels and apartments (urban hotels, Mediterranean style hotels, mountain hotels, apartment program).

Forget the cheap furniture because the guests have evolved and know very well what is beautiful, comfortable and good quality.

For apartments the made to measure furniture has always been the most ideal. The room cannot be as small as it can be the furniture we are making !

Every inch of your apartment space will be used to the maximum...
a wall to wall bed, a wall to wall wardrobe, a wall to wall kitchen.

Kitchens

The kitchen is a place where you spend some time every day preparing food, so it is essential for it to be functional and pleasing to the eye.

Made to measure kitchens are made using the 3D computer technology in order to create your dream kitchen together with you.

The same as preparation and cooking good meals is a demanding job, equipping a kitchen also requires good planning and preparation.

Our many years of experience of manufacturing kitchens guarantees the best possible product in the shortest possible time and at a price adjusted to the value of the product.

- The unique look of your kitchen
- A wide selection of materials
- Utilization of every inch of space in your kitchen of a smaller size
- Adjusting the kitchen to the particularities of your space

Wardrobes

Standard **built-in wardrobe** with sliding doors is a **made to measure** built-in wardrobe, floor to ceiling, wall to wall or from the wall to the other wardrobe side panel in the free space.

The most important function of a built-in wardrobe is to organise all your clothes in the best possible way and our goal is to offer you an **innovative response** according to your requirements in order to ensure enough space for your things, at the same time not burdening your living space.

The built-in made to measure wardrobe should be fully tailored to your needs and habits, space and taste, and also must be good quality, functional and durable.

Technical solutions to the wardrobe interior are very practical and with expert guidance and advice, together we will find the best solution that will offer the optimal use of the wardrobe space taking into account the selection of colours pleasing to the eye.

Bedrooms

Bedrooms made **for your needs** with a touch of romance, urban, country-style, traditional... Everyone wants a bedroom that is going to be **a place of relaxation**, a sanctuary from the outside world, a space in which you will be able to get rid of the accumulated stresses and problems accumulated during the day.

Therefore, you must make sure that your bedroom is cozy and very relaxing space which will enable you a good rest. It is extremely important that the bedroom is furnished in a way that evokes tranquility and calmness because this is the most intimate part of the living space.

Before choosing a bed you need to think about the design that includes the layout, size and colour of furniture, bearing in mind that a bed must dominate in the very center of the room.

The bedroom is a place where you start a new day and finish the previous one, so every detail should be carefully considered to give you a feeling of total relaxation and rest.

Children's rooms

Manitu d.o.o. manufactures made to measure children's rooms, and customers are advised not to overdo with furniture when planning it, but to leave enough free space for children to play. Children's rooms should be well-lit. They should be cleaned and tidied up daily.

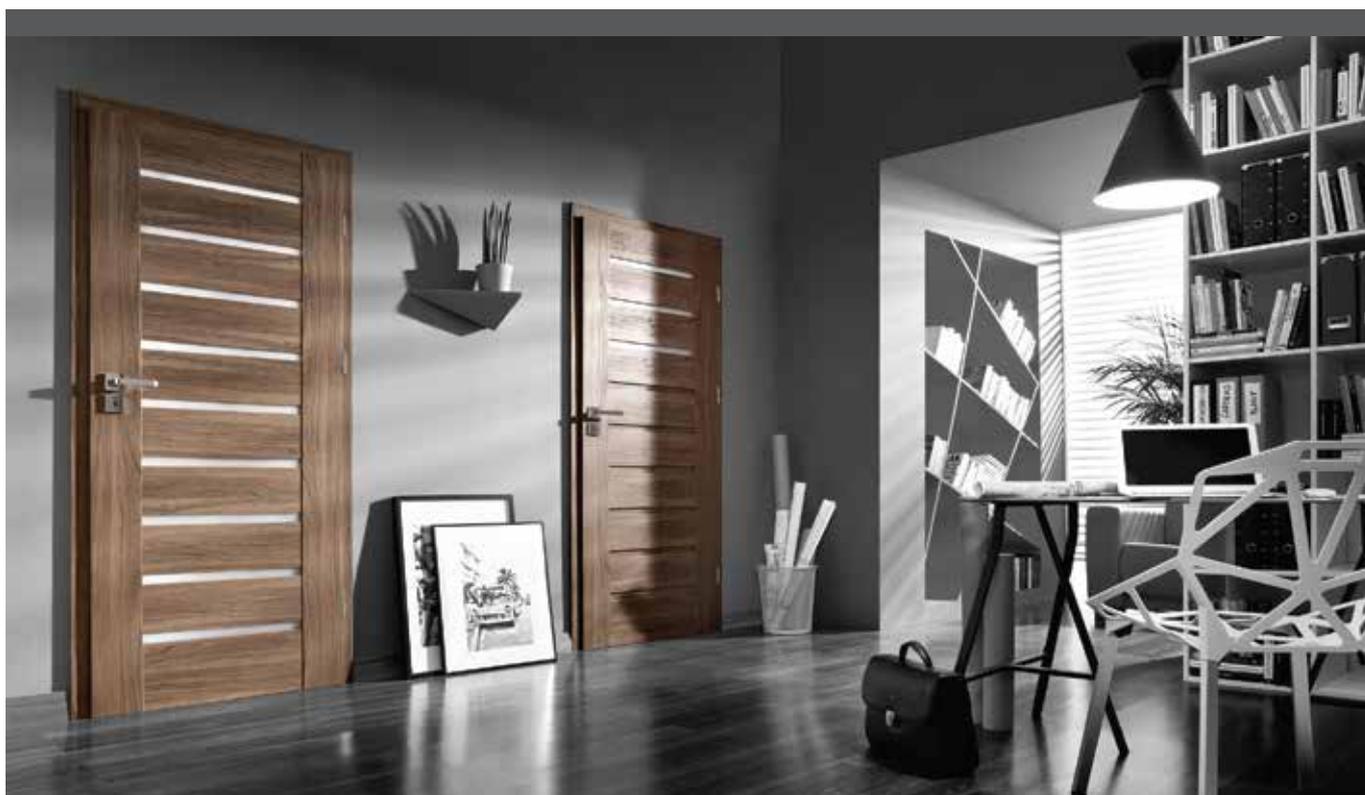

Whether the room is designed for one or two children and depending on the dimensions of the room we will make a single bed, bunk beds or a bed with the drawer in which an extra bed is placed. It is also good to put the nightstand so that a child could put a lamp on it, a book or a drink for the night.

An essential element in the pupil's room is a desk. When setting up a desk make sure there is enough natural light. The cabinets should be adapted to children's needs for storing clothes, books, school supplies, toys and other things.

The most common material for the manufacture of children's rooms is chipboard because of its quality and price. Wide range of colours allows creative and imaginative decoration of children's rooms in which your child will feel comfortable and happy to spend his/her time in it.

Doors

The door of your home is one of the first elements of design that your guests notice and it says a lot about you as a person. It is also the place where the hectic pace of the outside life ends and passing through them we enter our own little private world in which we by ourselves determine the pace of life. The function of the front door is protection while you are indoors, and therefore it should be strong, durable and resistant to all weather conditions.

MANITU d.o.o. is a distributor of brands **PORTA DOORS** i **VERTE** and PORTA KMI POLAND - the largest European manufacturer of interior wooden doors and windows (approximately 1,000,000 sets of doors per year) for the Republic of Croatia. Our assortment includes interior doors, the main entrance door, the front door to the apartments, industrial doors for hotels, restaurants, hospitals, fire doors and various technical doors in a wide range of models and colours, that will meet all your requirements in terms of quality, design and price.

Od ponude unutarnje stolarije izdvajamo:

- front doors for hotel rooms-apartments, with soundproofing of 27-42 dB, in a wide range of colours and design.
- room doors with a full flat or antique wing, as well as doors with glass, suitable for hallways and bathrooms.

In addition to sales/advisory services, we also offer services of measuring, dismantling the current joinery and installation of the products you can purchase at very reasonable prices.

Sanitary cabins

Trends in construction, planning and design are improving day by day. The constant quest for better materials to replace the old ones and allow greater functionality, on the other hand more economical, long-lasting solution in manufacturing solid walls and partitions, resulted in the emergence of HPL compact panels on the market.

HPL compact panels

allow very fast installation of walls and partitions, but also provide resistance to impacts, influence of water and chemicals, they are resistant to development of fungi and bacteria, and are easily cleaned with disinfectants.

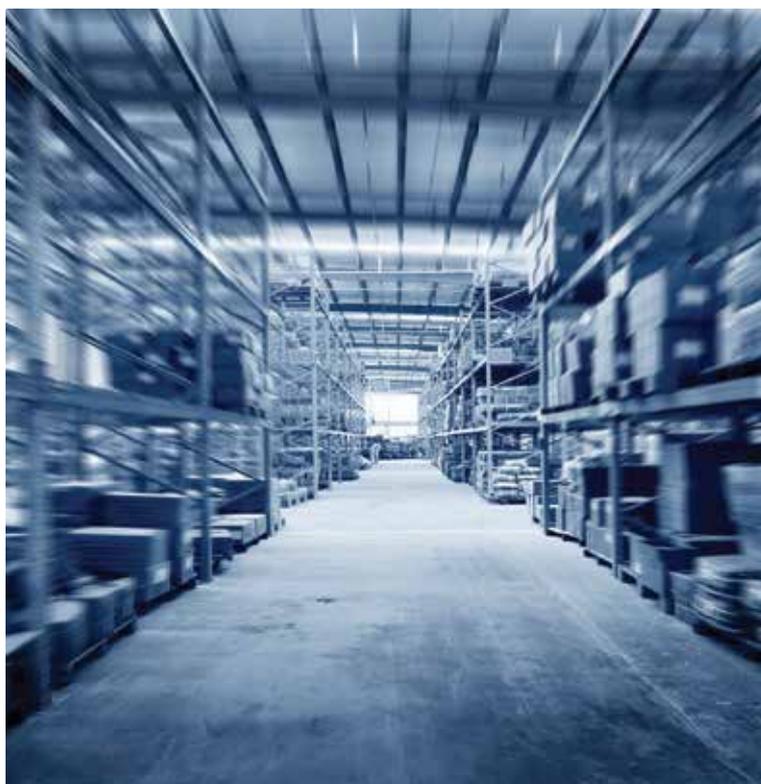

Therefore, HPL compact panels are an ideal solution for all spaces, regardless of its size and needs, because they **provide new opportunities in design and selection of decor and fittings.**

Warehouse equipment

The modular rack system, highly customisable in an area with a lot of additional elements, the electrostatically neutral and ecologically clean product meets the operational and structural requirements of **small, medium and large retail spaces** for food and other merchandise.

- design, building of self-supporting warehouses,
- stands for automated pallet storage,
- shelves for pallets and goods in bulk,
- platforms at one or more levels,
- shelves for spare parts, archives, shops, work and sales counters,
- vertical storage for all purposes,
- design of all kinds of warehouses
